ADVICE TO REFERRING AGENCIES

REFERRAL PROCEDURE

Pre-admission

It is preferable that potential Residents view the Hostel, before referral forms are submitted, so that they are confident in their decision to reside at this particular Hostel. A final decision cannot be made unless this process is followed and the Resident is happy with their choice.

Referral Form

The Hostel Referral Form as follows, *must be completed in full* prior to the applicant being admitted for the initial trial period. New Residents will not be admitted and assessment of the information will not occur before all relevant information is obtained from the Referral Agency. This requirement is mandatory and ensures as much as possible, that the delivery of care is seamless, the care is adequately planned and delivered and Resident and Staff safety is optimised.

Additional required documentation for admission.

Apart from the completed Referral Form, other documentation is required if applicable:

- A copy of the Discharge Summary if leaving Hospital e.g. mental and physical diagnoses; any infectious diseases; reason for admission; treatment provided; current medications and discharge plan;
- A current mental health assessment and plan;
- A current risk assessment, outlining current and past risks;
- The name of the current treating medical practitioner and contact details; and/or
- Any other documentation, which may assist the Hostel in understanding and assessing the individual's care needs.

Acceptance of Resident

Acceptance is based not *only* on the receipt of completed documentation and Resident satisfaction with the choice of Hostel. The availability and type of accommodation at the Hostel is affected by the history and category of the applicant; the dependency of the Resident; the amount and type of staff assistance, care and supervision required; the gender of the Resident; the Resident's choice of accommodation and any other special requirements.

Trial period

There is a mandatory requirement that all new Residents complete a *four week trial period*. The referring team/agency is responsible for the Resident during this period until formal acceptance by all parties and that these arrangements need to be given in writing to the Hostel. The Resident should bring in *two weeks medications, preferably four and two weeks board fees* for the trial period. In addition, the referral agency should inform the Resident of these arrangements and agree to an immediate transfer back if the trial proves unsatisfactory. It is important to note that some Residents may require a longer transition period, which will need agreement from all parties.

Referral Outcome

Notification of the referral outcome will be conveyed in writing by the Hostel and may be one of four responses:

- the Referral Form is returned due to incomplete documentation with a request for further information;
- the applicant is refused admission;
- the applicant is accepted for a four week trial period; or
- the applicant is accepted and placed on the waiting list.

Acceptance of Applicant to admitting Hostel.

If the applicant is accepted the referring agency is then responsible for organizing all appropriate referral documentation and will need to comply with the admitting Hostel's *Admission Policy* to ensure that all requirements of the policy will be met.

Additional documentation will be required on admission:

- List of Resident's *Property and Valuables* (as attached);
- *Resident Authorisation* to release and/or obtain information from other agencies (as attached);

A copy of the *Admission Policy* is also attached for your information.

Availability of information to complete Referral Form

It is understood that some of the information requested by the Hostel may not be available, or is not applicable. A notation 'Not known' or 'Not applicable (N/A)' should be documented in the relevant space. Otherwise, a response is required for each space.
